## **Marrakech hosts the 5th edition of the International Single Window Conference and exhibition from the 5th to the 7th September**

The development of foreign trade and the means adopted, are considered as a locomotive that will drive the economies of states to assume leadership position on the international scene and make it an important trading platforms between all countries of the world.

It is in this context, and in accordance with the vision of his Majesty King Mohammed VI may God assist him, aiming to increase the level and quality of services provided for the development of this sector and taking into account the importance that we attach to increase the efficiency of these services at the level of international trade through different border crossing points such as ports and airports and roads and the excellent positioning of the National Single Window of Foreign Trade «PORTNET» in the African, Arab and international levels, that National Single Window "PORTNET" organizes in partnership with the National Ports Agency, the African Alliance for Electronic Commerce, the Moroccan as well as several actors in this area, the fifth edition of the International Single Window Conference and exhibition, that will take place from the 5th to the 7th September 2016 at “Palais des Congrès” in Marrakech – Morocco under the theme : "virtual single window of foreign trade: the requirement of an inclusive collaboration", under the auspices and under the auspices of the Ministry of equipment, Transport and logistics and the Ministry in charge of the International Trade .

The Organization of this edition in the Kingdom of Morocco is a result of the efforts made by all actors of the public and private sectors for the improvement of the business climate for the community's external trade in its entirety and this through the provision and upgrading in place, the last trends in materials of electronic services to facilitate procedures, improve the competitiveness of enterprises and the involvement of all components of the sector: administrations, departments and economic operators in the establishment of a comprehensive, participatory and inclusive approach. The main objective of this approach is the awareness of the strategic importance that should be given to all stakeholders, especially companies, for a complete integration of logistics and supply chain, that represent an undeniable competitive advantage. This edition will be a unique opportunity for the development of the means adopted in the field of international trade through the exhibition of the latest innovative solutions, the exchange of experience and coordination of efforts between all participants.

This event will bring together thousands of entrepreneurs and more than 18 African countries, as well as many national actors and international experts in this area, international institutions such as: United Nations and World Bank, the World Trade Organization and the world Organization of customs and many national and international economic operators acting at the ports, airports Logistics and solutions technology leader in the previously mentioned areas.
